### Following the Bison

F MEMORY be not treacherous, a private citizen of the United States, by name Theodore Roosevelt, erstwhile explorer in South America, recently penetrated into the wilds of Maine in an endeavor to find a specimen of the now almost extinct Alce Americanus, of the male sex. In 1912 he was exceedingly numerous. Two years later even the greatest zoologist—he says so him-self—could find few traces. The call, resounding through the woods of Maine, went almost unheeded, although scientists tell us that he abounds in the forests of Canada and Northeastern United States. The search ended Monday, and at the round-up only onethird of the great herd of two years ago was this State have had brought home to them the in the Far East, was there in greater numbers; the donkey was as ubiquitous as of old, rapidly going the way of the boss bison.
